SCRAM®
REMOTE BREATH

Flexible, wireless breath alcohol testing built to meet the needs of community corrections.

Improve accountability with device-initiated testing, automated facial recognition, and a GPS point with every test.

SCRAM Remote Breath® provides handheld, portable breath alcohol monitoring with options for scheduled, random, and on-demand testing. For your lower-risk clients or those who have earned less intensive monitoring.
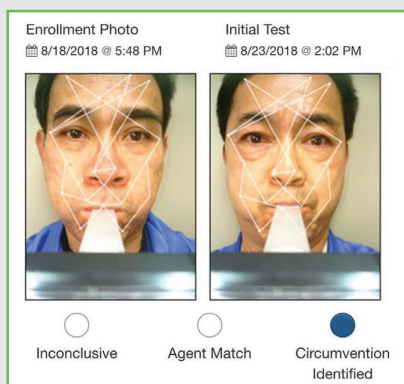

Features

- Immediate notification of BrAC and client ID results
- Ethernet capability enables enrollment anywhere with Internet access
- GPS location with taken *and* missed tests
- Device automatically turns on and prompts client to test
- Flexible testing schedules

- STORE & FORWARD technology ensures all test results and data are captured and reported
- Promote compliance with optional client reminders via text or the SCRAM TouchPoint™ mobile app
- Rugged, built for corrections
- Proven fuel cell technology with ability to test down to 0.00 BrAC
- Easy to carry, easy to use

Automated Facial Intelligence™ (AFI™)
## Decreases Manual Photo Review by 90–95%

- Government security-grade facial recognition—not just photos
- Real-time client verification
- Significantly reduces the staff time required to review and confirm client identity
- High resolution camera ensures clear photos for the 5–10% you do need to review
- Smart technology further improves matches by automatically prompting clients to retake poor test photos

AFI Identifies Circumventions

Enrollment Photo
📅 8/18/2018 @ 5:48 PM

Initial Test
📅 8/23/2018 @ 2:02 PM

○ Inconclusive ○ Agent Match ● Circumvention Identified

AFI caught mismatched photos. Client admitted to having his cousin take his scheduled test.

Workload Reduction With AFI

🟩 Remote Breath with AFI
🟥 Devices without AFI

	PHOTOS PER DAY	PHOTOS PER WEEK
Remote Breath with AFI	24	168
Devices without AFI	400	2,800

Industry comparison of manual photo matching in an average program.
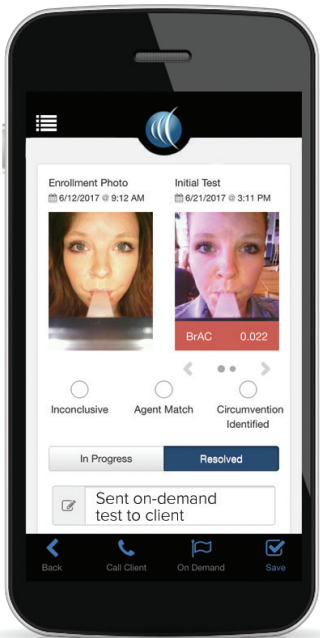

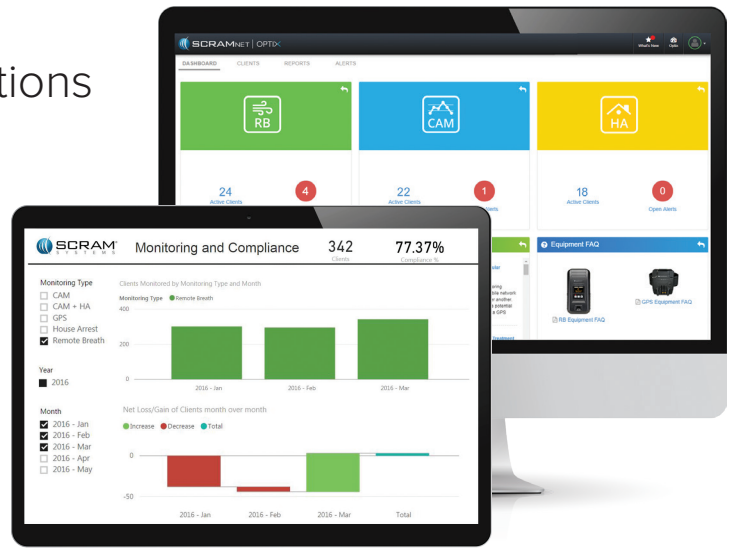

Simplify client management with integrated software and mobile solutions

Unified Workload and Reporting

SCRAMNET Optix™ brings together all of your electronic monitoring clients in one user experience

Integrated reporting illustrates key program metrics, turning data into insights

SCRAM Interactive Program Analytics provide in-depth, configurable analysis of your program's health

Mobile Client Management

Manage Remote Breath clients anytime, anywhere with the SCRAMNET Mobile™ app

Receive instant notification of alcohol events, missed tests, and attempted circumventions

Resolve alerts, add notes, and send on-demand breath tests on-the-go, 24/7

Call clients with a single tap and view a client's address or testing location in Google Maps™

Dynamic Client Engagement

The SCRAM TouchPoint™ client mobile app provides a better way to manage common interactions with clients

Communicate directly with individual clients from your SCRAM Systems dashboard with secure, two-way messaging

Automated reminders improve client compliance and accountability

Add another layer of supervision with configurable, mobile check-ins
